Education

Clemson University Expected May 2027
Bachelor of Science in Computer Science, Minor in Cybersecurity GPA: 3.61 / 4.00

Experience

AI-Assisted STIG Remediation 08/19/2026 - Present
Department of War, Clemson Capstone Clemson, SC

- Developed Python and PowerShell validation tools for an AI-assisted platform that generates and tests scripts to remediate Windows Server security findings
- Audited DISA STIG scan coverage across four Windows Server releases, helping establish three validated baselines for evaluating remediation scripts
- Built evidence collection tooling using versioned Amazon S3 artifacts and SHA-256 hashes to preserve scan integrity and support reproducible testing

Security Analyst Intern - Tier 2 Firewall Operations 05/15/2025 - 05/01/2026
Clemson Cybersecurity Operations Center Clemson, SC

- Investigated and triaged 9,000+ security alerts, reducing false positives and ensuring timely remediation of threats
- Collaborated with analysts to defend against phishing attempts, brute force logins, and compromised credentials, safeguarding 25,000+ faculty and student accounts
- Monitored and investigated endpoint and email activity using Splunk, Microsoft Defender, and Abnormal Security
- Reviewed firewall logs for suspicious activities, potential breaches, and compliance issues

Offensive Security Analyst Intern 05/15/2026 - Present
Clemson Cybersecurity Operations Center Clemson, SC

- Conducted web application security testing using Burp Suite, OWASP ZAP, and Gobuster to identify vulnerabilities, exposed resources, insecure configurations, and potential attack paths
- Used Metasploit to validate and assess the exploitability of known vulnerabilities in controlled environments, helping determine potential attack impact and remediation priorities
- Analyzed findings from Dynamic Application Security Testing (DAST) tools, including Invicti, to understand scanner results and validate vulnerabilities

Service Desk Assistant 09/01/2024 - 04/27/2025
Clemson Computing and Information Technology Clemson, SC

- Troubleshot a wide range of IT problems, including hardware malfunctions, software issues, and network connectivity
- Provided technical assistance through multiple channels, including in-person consultations and VoIP support
- Demonstrated strong customer service skills, addressing user inquiries and resolving issues with patience and clarity

Activities

Clemson Cyber Defense Team Firewall Lead Spring 2024 – Present
Collegiate Cyber Defense Competition (CCDC) and Scrimmages

- Designed and deployed enterprise-like Ansible network environments to simulate realistic infrastructures
- Documented incidents and developed practice labs, improving team readiness in intrusion detection, incident response, and system hardening
- Configured and managed Palo Alto firewalls in lab and scrimmage environments to mirror enterprise network defenses

Skills

Programming: Rust, C, C++, Python, Java, JavaScript, HTML
Security Tools: Splunk, Microsoft Defender, Abnormal AI, Ansible, Palo Alto
